To
The Director of Community
Development, MADRAS.

Sir,

COMMUNITY PROJECT--South Kanara--Animal Husbandry Extension--Starting of sub centres--for artificial insemination--proposals of the Dt. Vety. Officer--South Kanara--Regarding.

JOINT SECRETARY TO GOVERNMENT RURAL DEVELOPMENT 18 AUG 1955 6345

Ref: Letter No.2129/55 dated 17-7-1955 from the Dt. Vety. Officer, S.K.

--

In his letter cited, the Dt. Vety. Officer, South Kanara has suggested that in addition to the existing centres, for artificial insemination in Mangalore, sanctioned in G.O.Ms.No.1622 Pub. R.D.P. Dept. dated 11- 9- 1954, sub centres may be started at the following places where the cattle population is large enough to ensure the success of the scheme.

Sl. No.	Name of the centres proposed.	Block in which situated:
1.	Mulky.	Ist Block.
2.	Bajpe.	-do-
3.	Kinnigoli.	IInd -do-
4.	Moodabidri.	-do-
5.	Karkal.	IIIrd block.

One Murrah buffaloe and a sindhi bull are stationed at each of the centres at Bajpe, Moodabidri and Karkal. There are 2 sindhi bulls and a murrah buffaloe at Kinnigoli where the Village Live Stock Improvement Scheme sanctioned in G.O.Ms.No. 1365/R.W. Dept. dated 17-12-1952 and taken over by the Community Project as per G.O.Ms.No.1340 Pub. (R.D.P.) Dept.) dated 13-8-1954 is in operation.

The Dt. Vety. Officer, South Kanara in his letter dated 17-7-1955 (copy enclosed) has stated that the breeding bulls stationed at the centres under Community Project Scheme are inadequate to meet the needs of the localities and that representations from the public for starting sub centres for artificial insemination have been received. There are coop. milk supply societies at Mulky, Moodabidri and Karkal where the people are keen on having artificial insemination. The concentration of cattle at Kinnigoli centre is so high that the bulls now stationed there do not meet the demands fully and a number of cattle brought for servicing are turned away daily. The scheme now proposed is worth implementing for the reasons explained above.

P.T.O.

The total expenditure involved is Rs.39,704/- (Non-recurring Rs. 25,000/- plus recurring Rs.14,704/-) The savings that will accrue by withdrawal of animals now stationed at the centres after introduction of the scheme is Rs. 18,336/- (non-recurring 9000/- plus Rs.9336/-) The net expenditure works out to Rs.21,368/-.

In the Community Project budget no savings can be effected under any of the schemes particularly under Animal Husbandry Extension to meet the expenditure involved in the above proposal. | B

The allotment under Animal Husbandry as per the approved revised Overall Programme of this Community Project is Rs.112,500/-. The sanctions so far accorded for different items of work under Animal Husbandry involve an expenditure of about Rs. 1,17,730/- which itself has exceeded the original allotment in the revised overall programme. In addition to the amount already sanctioned, a sum of about Rs.94,000/- will be required for meeting the expenditure on recurring items etc. under Animal Husbandry. Extension for the remaining period.

Thus the total requirement under Animal Husbandry extension is approximately Rs. 2,11,730/- as against the provision of Rs. 1,12,500/- in the revised overall programme. This additional expenditure is proposed to be met by reallocation of funds under various other items in the overall programme.

In view of the non-availability of funds in the Community Project budget to meet the expenditure involved in the Dt. Vety. Officer's proposals, and also in view of the real need for implementing the scheme, I submit that the Government may kindly be pleased to sanction the scheme and meet the expenditure from the State Funds in consultation with the Director of Animal Husbandry, if necessary. | A

PROJECT EXECUTIVE OFFICE
19 JUL 1955
MANGALORE

R&C. No. 2129 /55 dated 17.7.55.

Office of the District Veterinary Officer,
South Kanara, Mangalore.

From.
Dr. P. Kumaran Nair, G.M.V.C.
District Veterinary Officer,
South Kanara, Mangalore.

To:-
The District Collector,
M A N G A L O R E.

Sir,

Subject:- ANIMAL HUSBANDRY - ARTIFICIAL INSEMINATION - COMMUNITY PROJECT AREA - EXTENSION OF - OPENING OF SUB CENTRES.

Ref:- C. No. 2278/54 C dated 10.6.55 of the Project Executive Officer, Mangalore.

At the last Project Advisory Committee meeting it was suggested to open an artificial insemination centre at Mulky. Subsequently the District Collector during his visit to Kinigoli has remarked in the visitor's book of the Village Livestock Improvement Centre that an artificial insemination sub centre may be started at Kinigoli in view of the fact that the 3 breeding bulls stationed at that place are not adequate to meet the demand of the people. Further, representations from the public for sub centres have been received pressing the question of opening them and hence the question of opening sub centres have to be taken up together instead of one by one. I recall the interview the Special Officer for artificial insemination, Madras and myself had with the Collector on 16.7.55 and the comprehensive programme tentatively agreed at that interview is enclosed for favour of necessary action.

Yours faithfully.

PKumaran Nayar 17/7

District Veterinary Officer,
South Kanara, Mangalore.

Copy to the Project Executive Officer, Mangalore.
Copy to the Special Officer, for artificial insemination, Madras, Camp Palghat.
Copy submitted to the Director of Animal Husbandry, Madras, for favour of information.

Scheme for starting of Artificial Insemination Sub Centres in the Community Project area - South Kanara District -

An artificial insemination centre was opened under the community Project at Mangalore on 24.4.55 and was inaugurated by the Hon. Minister for agriculture, Madras. The artificial insemination centre is maintaining at present 3 scindhi bulls and has done so far i.e. upto 17.7.55, 228 inseminations for a period of about 2½ months which compares favourably with the progressive centres of the state. The enthusiasm and cooperation evinced and entertained by the public in Mangalore town and the rural parts in general towards this scientific technique is quite encouraging and I am convinced that the time is quite oppertune to extend the activities of this mangalore centre to suburban parts in the project area so that the benefits could be reaped by the public in a large measure. I have received personal and group representations from leading men in the project area regarding the extension of the benefits of the artificial insemination to other parts and thanks to the interest evinced by the Collector of South Kanara and the Project Executive Officer, Mangalore. There is now a great public genuine urge in the area for more and more facilities in this direction.

Oppertunity was availed to discuss this question in an informal meeting with the District Collector, Project Executive Officer during the visit to Mangalore on 16.7.55 of the Special Officer for artificial Insemination, Madras and it was generally agreed to start sub centres at the following places in the project area in the first instance as they were considered suitable for the following reasons.

1. Karkal.
2. Moodibidri.
3. Bajpe.
4. Mulky.
5. Kinigoli.

1. At Karakal, Moodibidri and Bajpe, there are Veterinary Dispensaries under the community project scheme in charge of Veterinary Asst. Surgeons.

2. At Kinigoli and Mulky there are Veterinary and Livestock Inspectors Providing veterinary aid in that area.

3. Breeding bulls are being maintained in all these centres except Mulky.

4. The General response of the public towards Animal Husbandry and Particularly towards Artificial Insemination is quite encouraging and convincing.

5. Concentration of female cattle around these centres are comparatively more.

The livestock census figures regarding the female (breedable) Population within a radius of five miles is given below for reference.

	Cows.	Buff.		Cows.	Buff.		Cows.	Buff.
1. Karkal.	3849	1924	3. Bajpe.	2015	1280			
2. Moodibidri.	2801	1321	4. Kinigoli.	2516.	1128.	Mulky.	2419.	1234.

The financial implication of the scheme for staring these sub centres were discussed in detail by me with the special officer for artificial insemination and a scheme was drawn up in detail and then explained to the Collector and Project executive officer who had been good enough to express their agrément in general. It was also opined that the breeding bulls maintained at the four of the five proposed centres could be withdrawn and usfully transferred to other areas where the demand is more and the dearth of pedigree bulls is keenly felt. Under this scheme for starting sub centres the artificial insemination centre, Mangalore will require 3 Murrah Buffalo bulls in addition to the 3 scindhi bulls now stationed. Under the scheme 3 Veterinary and Livestock Inspectors are to be provided on ch for Bajpe, Moodibidri and Karkal for the Artificial Insemination sub centre. The Question of distribution of semen to these 5 centres were discussed with the special officer in detail and it was decided that a fast conveyance, preferably a Jeep is absolutely essential for the purpose in view of the

fact that a distance of about 90 miles have to be covered each time the supply of semen to these centres at one time. The supply will be from the main centre, Mangalore every third day.

The financial implication of this scheme is as follows.

Extension of the artificial insemination work- Mangalore.
. . . Extra financial implications.

	Non-recurring. Rs.	Recurring. Rs.
1. Cost of 3 Murrah buffalo bulls for Mangalore artificial insemination centre at Rs. 1000/- each.	3000/-	-
2. Cost of 5 refrigerators for these centres at Rs. 1500/- each.	7500/-	-
3. Cost of artificial insemination equipment and general stores for 5 sub centres at Rs. 500/- each.	2500/-	-
4. Cost of 5 cycles at Rs. 200/- each for the 5 sub centres at one each(for the staff for verification and record of cows inseminated.)	1000/-	-
5. Cost of 5 service crates at Rs. 200/- each	1000/-	-
6. Pay and D.A. of 3 Veterinary and Livestock Inspectors at Rs. 60/- and Rs. 22/- p.m.	-	2952/-
7. Feeding charges of 3 bulls under item 1 above at Rs. 60/- p.m. for each bull.	-	2160/-
8. Contingencies including running expenses of refrigerators, replacements of glass ware etc at Rs. 500/- for each centre.		2500/-
9. Pay and D.A. of 7 attendants at Rs. 15/- and 18/- p.m.(2 attendants for mangalore main centre and 5 for five sub centres).		2772/-
10. Cost of one Jeep for the transport of semen and propaganda purpse.	10,000/-	-
11. Pay and D.A. of Jeep driver ar Rs. 40/- and 20/- p.m.	-	720/-
12. Running expenditure of the jeep at Rs. 250/- p.m.	-	3000/-
13. T.A. for the driver and one attendant at Rs. 50/- p.m.	-	600/-
Total for one year.	25,000/-	14,704/-

Grand total. Rs. 39,704/-

As discussed earlier in the scheme, bulls maintained at the proposed centres will be withdrawn for other areas and the consequent savings under various items are detailed below.

SAVINGS.

	Non-recurring. Rs.	Recurring. Rs.
1. Cost of 9 bulls (5-scindhis and 4 Murrahs at Rs. 1000/- each (now stationed at the four centres).	9000/-	-
2. Feeding charges for the above 9 bulls at Rs/- 60/- each.	-	6480/-
3. Pay and D.A. of 6 attendantsat Rs. 15/- and Rs. 18/- p.m. (proposed to be retrenched)	-	2376/-
4. Contingencies at Rs. 120/- per centre.	-	480/-
Total.	9000/-	9336/-

Note:- Savings for the first year. Rs. 18336/-
Savings for subsequent years. Rs. 9336/-

Therefore the extra expenditure actually involved under the whole scheme would be as follows.

1.	Non- recurring.	Rs. 16,000/-	During the first year.
2.	Recurring.	Rs. 5368/-	

The non recurring and recurring for each centre will only be

Non- recurring. $\frac{16000}{5}$ = Rs. 3200/-

Recurring. $\frac{5368}{5}$ = Rs. 1074 (apprx).

The Main advantages of the scheme are as follows.

1. The total capacity of services of the 9 bulls now stationed at the proposed centres is only 900 services per ~~year~~ year. ~~If the~~ If the Artificial insemination sub centres are opened at least 250 cows and she buffaloes are expected to be inseminated in the first year, thus bring the total inseminations in a year to 2000. This is capable of further improvement every year without extra expenditure and the benefits to the public will be far reaching and may be inestimable in course of time.

2. In view of the shortage of pedigree bulls at present the 9 bulls thus withdrawn can be distributed to other areas where there is great demand.

3. At present Veterinary Asst. Surgeons i/c Veterinary dispensaries at Karkal, Koodibidri and Bajpe have touring work and consequently the dispensaries are closed frequently with great annoyance to the public. Under the scheme the 3 Veterinary and Livestock Inspectors proposed to these three centres will attend to the veterinary work of the dispensary without break and this will make the dispensaries popular.

4. Intensive work in livestock improvement can be effected by opening these sub centres where the scope for work is more.

5. The main artificial insemination centre at Mangalore can be ~~xx~~ usefully utilised by expanding its activities over a larger area providing facilities to more people.

Considering the above advantages the extra expenditure involved in executing this scheme is negligible and will be of immense help in improving the livestock of this district.

Sir,

UNDER SECRETARY TO GOVERNMENT
3 OCT 1955
AGRICULTURE DEPARTMENT

Sub: Community Projects-South Kanara- Animal Husbandry-Extension -Starting of sub centres- for artificial insemination-proposals of the District Veterinary Officer--South Kanara--Regarding.

Ref: Government Agriculture Department endorsement 78747.C.II/55-1 dated 13-9-55.

I wish to state that the scheme for opening such centres for the artificial insemination centre at Mangalore has been drawn up by the District Veterinary Officer, South Kanara in consultation with the Special Officer, Artificial Insemination and discussed in detail with the Collector and Project Executive Officer, Mangalore. The scheme is a sound one and can be worked successfully. The availability of funds should have been taken into consideration while drawing up the scheme. As regards the provision of funds it is left for the consideration of Government; but it is not advisable to mix up the State and Community Projects Schemes. The expenditure on the scheme will have to be met from the Community Projects budget.

Yours faithfully,

for Director of Animal Husbandry,
Madras.

kv. 30.9.

Pub(RDPV)Dept

Memorno 28993 RDPV/55-2 dt 2-11-55.

Sub: CPs - South Kanara - Animal Husbandry Extension - Starting of Artificial insemination sub-centres - Revised proposals - Called for.

Ref: From the D.A.H, Madras letter No 9322D2/55 dt 30-9-55.

— ∧ —

The D.A.H, has stated in his letter cited that the expenditure on the scheme will have to be met from CP funds as it is not admissible to mix up the State and CP schemes. In this connection it may be stated that CP. Schemes are generally intended to intensify the activities of regular depts in CP. areas and that it is permissible to establish Artificial insemination sub-centres in CP. areas out of State funds with the financial assistance from CP. funds.

2. The scheme for opening five artificial insemination sub-centres in and around Mangalore as submitted by the Collr of South Kanara is somewhat expensive. There is no reason why a jeep should be provided for transporting semen and for propaganda purposes as the former can be taken by a bus or bicycle and the latter can be carried out by other ways. It may become necessary to entertain a few

messengers to transport semen and appoint addl Vety. Livestock Inspectors at centres, where the existing work is heavy. It is also unnecessary to have refrigerators at the Sub-centres, as semen can be transported in thermoflasks. The cost of Service Crate at the sub-centres can be met from C.P. funds.

3. The D.A.H is requested to revise the proposals for establishment of these Sub-centres on the lines indicated in para 2 above, wherever possible without extra-cost and for appointment of V.L.Os, attendants and messengers, wherever necessary and submit at an early date the revised proposals for sanction of the Govt.

GOVT SECRET 12 DEC 1955 PUBLIC DEPT

Roc.No.9322-D2/55.

Animal Husbandry Department,
Triplicane Post, Madras,
Dated: 8-12-1955.

From
Sri V.R.Rajagopalan, GMVC., Dip.Bact.(Manchester),
Director of Animal Husbandry, Madras.

To
The Deputy Secretary to Government,
Public (Rural Development Projects) Department,
Madras.

Sir,

Sub: Community Project - South Kanara - Animal Husbandry Extension - Starting of Artificial Insemination Sub Centres - Revised Proposals - Remarks - Offered.

Ref: Government Memorandum No.28993, Public (RDP)-V/55-2, dated 2-12-55.

With reference to the Government Memorandum cited above, I have to state that breeding work by Artificial Insemination method is a special technique which requires specially trained extra staff. Sufficient number of technical personnels are not available to carry out even the normal work of the Department. Animal Husbandry (Artificial Insemination work) work should not be combined with the normal agency of the Veterinary side and will not be conducive to efficiency. Artificial Insemination work does not stop with mere insemination but involves the follow up of every insemination, verification of calves born and maintenance of comprehensive records in this direction.

2. Further the supply of semen and storing it in Thermos flasks for long intervals have serious drawbacks. The replacements of ice even granting ice is readily available in villages to be served, would not guarantee the preservation of semen for periods over 24 hours as the uniform optimum temperature cannot be guaranteed. Moreover there will be no arrangement to check up the viability of the semen everyday before use.

3. In the circumstances stated above it is better to continue the existing arrangements until such time that the staff position improves and the Artificial Insemination Centre at Mangalore gains popularity for the technique.

Yours faithfully,

Director
10-12-55

PUBLIC DEPARTMENT

Public (RDP)-V Deptt.

The notes of Agri.Deptt. from p.1 ante may be perused.

The file deals with the proposal of the Collector of S.Kanara for establishment of sub-centres for the artificial insemination centre at Mangalore in the S.Kanara Project area at a total cost of Rs.39,704/-. He has stated that the expenditure on opening these centres will have to be met from State Funds as no funds are available in the C.P.Budget. This Deptt. have supported the proposal of the Collector of S.Kanara and remitted the case to Agri. for necessary action. That Deptt. have called for the remarks of the D.A.H. on the proposal. The D.A.H. has mentioned that the expenditure on the scheme will have to be met from C.P.Funds and added that it is not advisable to mix up the State and C.P.Schemes. In this connection it may be stated that it is permissible to establish Artificial Insemination sub-centres in C.P.Areas out of State Funds. C.P.Schemes are generally intended to intensify the activities of regular departments in C.P.Areas, ~~alone.~~

3. In the circumstances as stated by the D.A.H. the question of mixing the State and C.P. schem funds does not arise. The D.A.H. has not furnished any other reasons as to why the expenditure should not be met from State Funds for the establishment of these sub-centres. ~~In the circumstances~~ Agri. may, therefore, be requested to inform the D.A.H. accordingly and ask him to state why the expenditure on these sub-centres should not be met from State Funds.

3×15
3/11/58

The proposal of the Collector of Surat Kanara for starting 5 artificial insemination sub centres may be approved and the expenditure involved viz, Rs 25,000 non recurring and Rs 14,704 recurring) may be met from the state funds. Agri may issue the necessary orders in the matter.

6/11/58

Agri

b/

The scheme suggested by the C.M.O. is quite satisfactory. There is no reason why a jeep should be provided for transporting serum. It can be taken in by bus or by bicycle. ~~What is required~~ in it may be necessary to employ a few messengers to transport serum. It will also be necessary to appoint addl. V.L.D's at centres where the existing work is heavy.

The D.F.O's has separately suggested that the recurring cost involved in the maintenance of the C.A.I. centre at Mangalore ~~but~~ in the maintenance of the hulls at Karkal may be transferred to the A.H. Deptt. budget i.e. ~~that~~ ~~expenditure from~~ the Fisheries funds are already heavily committed to other expenditure.

The important point is that the serum drawn at Mangalore should be used to maximum advantage. For this purpose we should have such centres. The D.A.H. may be asked to ~~give effect~~ open such centres wherever possible without extra cost. ~~If only~~ & send up proposals for appointment of V.L.D's & attendants & messengers wherever necessary.

Serum is transported in ~~A~~ [illegible]

... it will be possible to provide refrigerators at most ... less than Rs 15 00[illegible] each ... D A H ... why to ... the proposal if this is done ... cannot be an unsurmountable difficulty, especially ... working ... p 11 C/c. ... (p 11) D A H ... should ... the scheme ... successfully

1/12/23

The D.A.H. has now gone back on his previous proposals. He has previously recommended storage & transportation in Thermos (Tanjore) but does not seem to favour it now. Though the idea being new, one has to revise one's view in the light of experience. In the circumstances explained by the D A H now, the Collector may be told that his proposals are not accepted

26/12/55

W.r.t orders above, a draft memo is submitted below for approval.
